

Clarification No. 1

Supply of new off-road 4x4 vehicle for Public Institution Galicica National Park

Prespa Green & Blue Initiative 05-501/1

Question

Will the Contracting Authority amend Item 5 of the Technical Specifications by reducing the minimum engine displacement requirement from 2.0 L / 1950 ccm to 1.9 L / 1850 ccm?

Answer

The request has been carefully reviewed. It has been determined that the technical specification, as defined in the Tender Dossier, is justified and fully aligned with the needs and objectives of the procurement procedure.

The minimum technical requirements have been established based on the operational requirements, the specific conditions under which the vehicle will be used, and the need to ensure adequate performance, reliability, and functionality in carrying out official duties.

Therefore, the proposed amendment cannot be accepted. The Technical Specifications and all other provisions of the Tender Dossier remain unchanged.
